

CORONAVIRUS DISEASE (COVID-19)

Managing COVID Patients in the Outpatient Setting through Recovery

Audience: Outpatient Department Leaders and Ambulatory Providers

Revision Date: 5/14/2020

Version: #2

What's New: Revised timing from 21 to 14 days for precautions threshold.

Purpose

Patients who are COVID-19+ or Persons Under Investigation for COVID-19 (PUIs) may require outpatient services during their recovery from the disease. Outpatient Departments and Ambulatory providers can use the guidance below to manage their care in the outpatient setting.
